

Color Order Worksheet

THE
Handweaving
Academy

List the colors in your design down the left side. In the first column, put the number of ends in the first stripe on the same row as the color used for that stripe. In the second column, put the number of ends in the second stripe on the same row as the color used for that stripe, and so on. There should only be one number in each column. Put the total number of ends of a color in the shaded column at the far right.

Print additional sheets if you need more colors or rows.

Color	Stripe order and number of ends (read from the left)																				Σ
